Size: 1/2" diameter, no shorter than 4" in length

**We recommend all anchor bolts to be expansion bolts and STAINLESS STEEL for installation into concrete surfaces. We DO NOT provide anchor bolts with our products due to the numerous surfaces to which our products are affixed (ex: brick pavers, concrete, terrazzo floors, etc.). We recommend that clients consult with their contractor or a hardware supply store for a recommendation on the appropriate type of anchor bolt to use for their application.**
