

### TIPSTER MOUNTING INSTRUCTIONS - LITTER MOUNT

We recommend the following to anchor Keystone Ridge Designs Tipster ash urn to one of our litter receptacles:

You will need to drill through the slats on the litter and bolt the Tipster in place.

1. Hold the Tipster up to the side of the litter where you want it.
2. Using a marker, mark the holes on the slat through the mounting bracket that is attached to the Tipster.
3. Remove the Tipster and drill  $5/16$ " holes through the slats where the two holes are marked.
4. After drilling the holes, apply touch up paint to the bare metal.
5. Insert  $1/4$ "-20 X 1" long bolts through the holes in the mounting plate and then through the slat.
6. Place a washer and nut on the back of the bolt.
